

# CH SERIES DESCRIPTION

## Precision Planetary Gearbox

Candy's CH Series is a compact, high precision planetary gearbox with a tapped rotary flange output. Case hardened and ground planetary gearing provides high wear resistance with less than 1 arc minute backlash. The flange output and taper roller bearing design provides high axial and radial load capacity.

- In-line servo gearbox with tapped rotary flange output
- High wear resistance, highest accuracy
- Low backlash design,  $\leq 1$  arc minute backlash
- 1 and 2 stages with ratios from 4:1 to 100:1
- Fits most NEMA and metric motors
