

CL23 SERIES DESCRIPTION

High Response Coupling

Candy's CL23 Series is a zero-backlash, high response coupling designed for optimal performance required in servo motor applications. Its integral rubber body maintains torsional rigidity while absorbing vibration and misalignment. The CL23 is designed for optimal performance exhibiting high speed, high response, high torque, vibration dampening and electrical isolating characteristics.

- High response, torsionally stiff servo coupling
- High speed couplings up to 42,000 rpm
- Integral rubber body absorbs vibration
- Rubber body provides electrical isolation
- High torque, zero-backlash, flexible shaft
- Inch, metric and mixed bores available

Options

- Aluminum Alloy Body
- Elastomer/Rubber Hub Connection
- Clamp Collar Shaft Connection
