

CL25 SERIES DESCRIPTION

Oldham Coupling

Candy's CL25 Series Oldham couplings feature stainless steel hubs and a copper insert. The higher durability copper insert increases the operating temperature range and greatly reduces wear, allowing the CL25 to maintain its zero-backlash rating longer than traditional Oldham couplings. The CL25 is designed for high torque, high response applications with a high amount of parallel misalignment.

- High torque, high torsional stiffness, high response
- Absorbs parallel and angular misalignment
- Zero-backlash, flexible shaft
- Inch, metric and mixed bores available

Setscrew Type

Clamp Type

Options

- Stainless Steel Hubs
- Copper Insert
- Setscrew
- Keyway and Setscrew
- Clamp Collar
