

CL5 SERIES DESCRIPTION

Disc Coupling

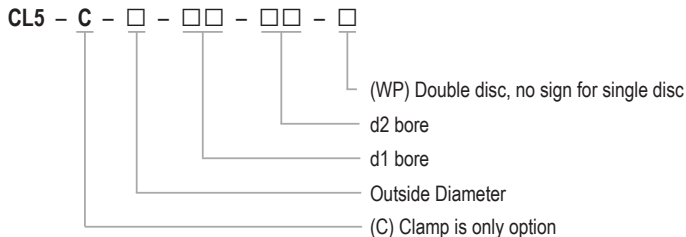

Candy's CL5 Series is a zero-backlash, flexible shaft servo disc coupling that features low inertia, high torque and excellent response. Its stainless steel plate springs absorb misalignment, helping avoid premature failure, while identical clockwise and counterclockwise rotational characteristics provide versatility for a wide variety of automation applications.

- Robust, torsionally stiff servo coupling
- Durable clamp type couplings
- Zero-backlash, excellent response
- Inch, metric and mixed bores available

Options

Aluminum 6061
Stainless Steel Plate Springs
Single Disc
Double Disc
Clamp
