

CFXR SERIES DESCRIPTION

Precision Planetary Gearboxes

The CFXR Series is a low backlash, high precision planetary gearbox that includes a 90 degree input through a helical bevel gear. Its 100% helical gears deliver high torque and low noise levels. Low friction bearings combined with input and output sealing assure less heat generation and reduced startup running torque, ideal for high cycle rate applications.

- Low friction servo gearbox
- Reduced breakaway torque
- Reduced temperature rise
- Stainless steel planetary housing and output
- Fits most metric and NEMA servo motors
