

CL12 SERIES DESCRIPTION

Encoder Coupling

CL12 Series Encoder Couplings connect encoders, resolvers and other feedback devices to production machines. The CL12 absorbs misalignment and provides electrical isolation which helps protect machine electronics from "noise."

- High strength polyester resin with glass fibers
- Engineered for a variety of encoder applications
- Zero-backlash, flexible shaft
- Low inertia, high speed
- Provide electrical isolation

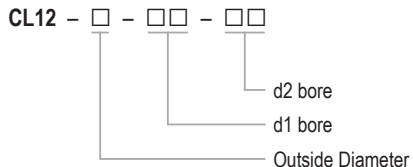

Options

Fiberglass Beam
-CL12-10, 13, and 19

Aluminum Hubs with Elastomer Insert
-CL12-25, 44, and 54

Setscrew
